BRUNOX®

PATENTED RUST STOPPER & PRIMER IN ONE!

Neutralises and dissolves rust, protects from further corrosion and primes all in one! Developed in Europe for heavy industry, auto-refinish, and DIY applications.

Compatible with most topcoats including 2K paints

Superior performance with 7 to 10 times deeper rust penetration than emulsions, no need for acids requiring wash-off!

- Compatible with most top-coat systems. Refer Technical Data Sheet for more information.
- Easy to achieve smooth finish without brush marks.
- No heavy metals or mineral acids.
- Easy to store.

Protect and Prime in 3 easy steps:

1. Sand/brush off loose rust.
2. Apply 2 coats of BRUNOX Epoxy to the porous rust (no washing or sanding necessary).
3. After it has fully dried, apply a coating system.
